

STUCCO
RESPIRA

BREATHABLE WALL FINISH WITH GLITTER

EASILY CREATE A PLEASANT AND ATMOSPHERIC LIVING ENVIRONMENT

THE BENEFITS OF STUCCO RESPIRA:

- It enhances a comfortable indoor climate by absorbing moisture and releasing it when the air is dry.
- It contains decorative glitter that becomes more or less visible depending on the application technique.
- It is easy to apply for both professionals and DIYers.
- Cemcolori offers 9 trendy standard colours.
- Stucco Respira can be tinted with standard or custom pigments/latex paint.
- Stucco Respira can be finished with a protective wax layer for areas with intensive use.

NCS S 6030-Y60R

NCS S 4020-Y30R

NCS S 5005-Y20R

NCS S 5502-Y

NCS S 6005-G50Y

NCS S 7010-B10G

We recommend priming the wall with Stucco Respira acrylic primer beforehand. It is available in a 1 kg bottle, suitable for approximately 10 m².

Stucco Respira comes in a 12 kg bucket, which covers 8 to 10 m² of wall surface. Add water and your chosen pigment or latex, then mix thoroughly with a mixer until you achieve a smooth, even consistency.

Stucco Respira is then ready to be applied to the wall using a trowel.

For more texture in the finish and to make the glitter stand out more, Stucco Respira can be sanded after application.

The colours shown may differ from the actual colours. In practice, colour appearance may vary due to lighting and the underlying surface.
