PERLAMURO

CONCRETE LOOK WITH PEARLESCENT EFFECT

PerlaMuro is a modern concrete-look wall finish with a pearlescent effect. It adds a luxurious and contemporary touch to your interior. PerlaMuro is easy to apply using a trowel or block brush. If you use a trowel, you'll achieve a smooth, even finish. If you use a block brush, you'll create a more textured wall with depth and relief.

PERLAMURO

CONCRETE LOOK WITH PEARLESCENT EFFECT

PerlaMuro comes in 17 standard colours.
It's even possible to tint PerlaMuro Base Natural using pigment or paint.
With 3 litres, you can cover 8 to 14.5 m² of wall surface.
When applied with a trowel, PerlaMuro goes on thicker than when using a block brush.
For optimal adhesion, first prime the wall with PerlaMuro acrylic primer.
